

CSC11006 - INTRODUCTION TO CLOUD COMPUTING SERVICES

PRACTICE

LAB: Working with BigQuery in Google Cloud Shell

I. General information

ID: LAB4
Period: 45 minutes
Deadline:

II. Outcome:

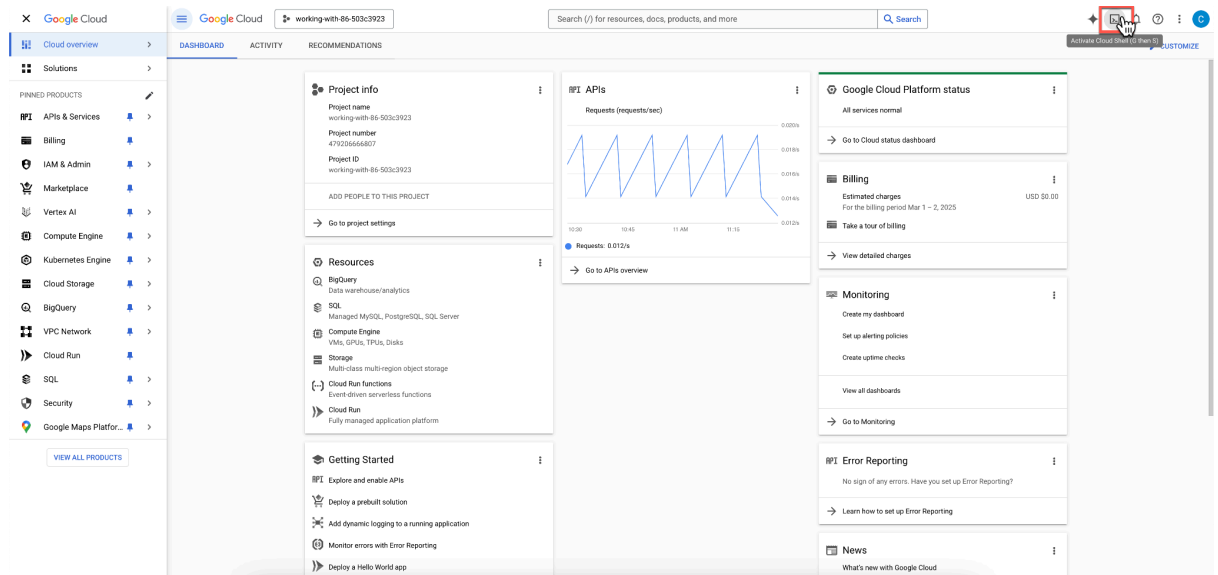

This lab will adapt to these following course's outcomes:

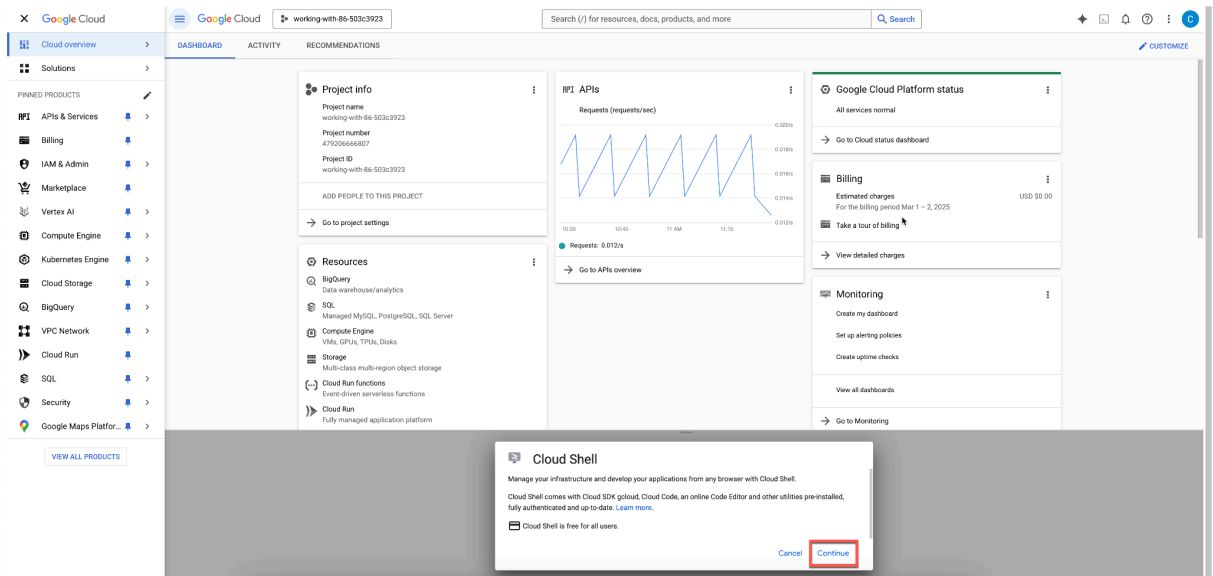

- G2.1
- G4.1

III. Describe:

1. Activate Cloud Shell:

Click the Activate Cloud Shell icon at the top of the console page.
Click START CLOUD SHELL.

2. Retrieve the data files:

Run the following command:

```
gsutil cp gs://acg-gcp-labs-resources/essentials/MetObjects_BQ_Lab.csv
```

3. Create a BigQuery Dataset:

3.1 Create a BigQuery dataset with the following command:

```
bq mk metobjects
```

3.2 List the current datasets.

```
bq ls
```

4. Load the data:

4.1 Import the data into the dataset.

```
bq load --source_format=CSV --skip_leading_rows=1
metobjects.linkedObjects MetObjects_BQ_Lab.csv
title:STRING,artist:STRING,year:INTEGER,link:STRING
```

4.2 View the dataset.

```
bq ls metobjects
bq show metobjects.linkedObjects
```

The screenshot shows the Google Cloud BigQuery Explorer interface. The left sidebar contains navigation options: Studio, Pipelines & Integration, Data transfers, Pipelines (Dataform), Scheduled queries, Scheduling, Partner Center, Settings, and Release Notes. The main panel displays the 'metobjects' dataset with a 'SUMMARY' tab selected. Below the summary, there's a 'Dataset replica info' section showing the primary location as 'US'. A 'Job history' section is also visible. At the bottom, a terminal window shows the execution of a bq command to load a CSV file into the 'metobjects' dataset.

5. Query the Dataset:

5.1 Execute the following SQL query:

bq query "SELECT year,title,artist FROM metobjects.linkedObjects WHERE year > 2000 ORDER BY year DESC LIMIT 15"

The screenshot shows the Google Cloud BigQuery terminal window. The terminal displays the execution of the SQL query: "SELECT year,title,artist FROM metobjects.linkedObjects WHERE year > 2000 ORDER BY year DESC LIMIT 15". The output is a table with three columns: year, title, and artist. The results show 15 rows of data, including titles like 'Ensemble', 'Two Trees', 'The Temptation of the Diagram', and 'Iktoti'.

5.2 Execute a second SQL query:

bq query "SELECT title,link FROM metobjects.linkedObjects WHERE year > 2000 ORDER BY year DESC LIMIT 15"

```

CLOUD SHELL

Ensemble

Designer

Christopher Kane

British

fall/winter 2018-19

Not on view

This ensemble from Christopher Kane's autumn/winter 2018-19 collection exemplifies the designer's ongoing interest in using fashion as a vehicle for his whimsical and pedagogical explorations into human sexuality. Though earlier collections have engaged with the topic in more abstract and metaphorical ways, several styles introduced this season were explicitly printed with illustrations and phrases culled directly from British scientist Alexander Comfort's instructional manual "The Joy of Sex" (1972).

The dominant graphic on this dress depicts a woman writhing with pleasure as her male partner bites into her flesh. Kane has printed the image—the work of British illustrator Christopher Foss—atop a translucent pale-pink silk chiffon. By layering the textiles, Kane achieves a delicate balance between obfuscation and revelation, underscoring the intimate nature of the subject matter. The sheath is punctuated on both ends with fuzzy marabou feathers, echoed in the fur-trimmed leather pumps that complete the ensemble, which can be read as a further allusion to carnality and the environment of the boudoir. Like other garments from the collection, the dress features phrases such as "More Jov" and "Sex"
