

Web Application Development

HTML

KHOA CÔNG NGHỆ THÔNG TIN
TRƯỜNG ĐẠI HỌC KHOA HỌC TỰ NHIÊN

- ☐ Understanding the origin and meaning of HTML
- ☐ Understanding the structure of an HTML document
- ☐ Knowing how to create an HTML page with basic HTML tags

- **HTML (HyperText Markup Language) - The Hypertext Markup Language**
 - The language used to build web pages.
 - Contains instructions for the web browser to display a web page.
- A web page consists of two main parts:
 - The content of the web page (text, audio, images, etc.)
 - HTML tags used to format and describe how the content is displayed in the browser.

```
<!DOCTYPE html>
<html>
<head>
  <title>Welcome to HTML</title>
  <style>
    body
    {
      background-color: Orange;
    }
  </style>
</head>
<body>
  <h3>
    Hello World !</h3>
</body>
</html>
```

Hello World !

According to the W3C organization regulations

Versions

- ☐ HTML 4.01
- ☐ XHTML 1.0 Transitional
- ☐ XHTML 1.0 Strict
- ☐ XHTML 1.1
- ☐ HTML5

HTML Validator

<http://validator.w3.org/>

☐ `<open tag>` **Data** `</close tag>`

☐ Sample tag names:

☐ **b** ~ Bold, *i* ~ Italic, **p** ~ Paragraph

☐ Self closed tags `<br>`, `<hr>`

☐ Syntax `<tag attribute="value" .....> Content </tag>`

☐ Example

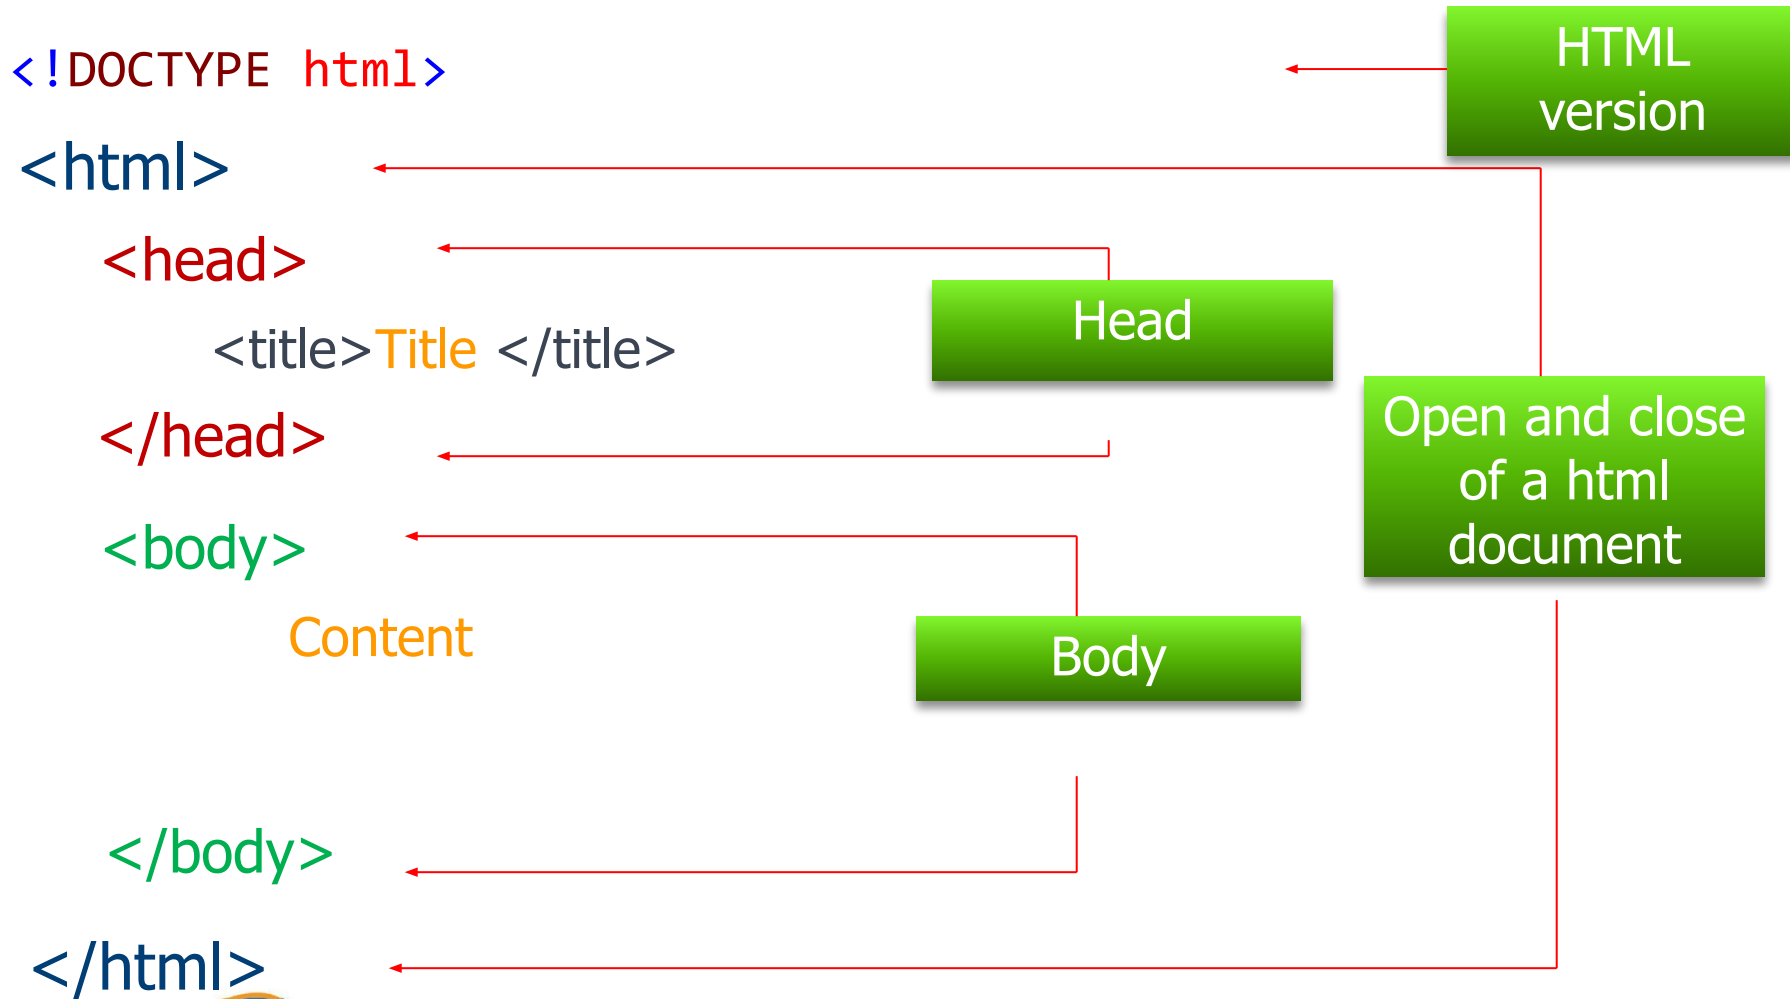

- `<div>`Web application development`</div>`
- `<div id="subject" style="color:#0000CC">`Web application development`</div>`

HTML code	Display
<code> Bold</code>	Bold
<code><h3> Heading 3 </h3></code>	Heading 3

Note:

- The attribute values of tags must be placed in double quotes.
- Case sensitivity does not matter; but lowercase is preferred
- Extra whitespace and line breaks will be ignored.

```
<!DOCTYPE html>
<html>
<head>
  <title>Welcome to HTML</title>
  <style type="text/css">
    body
    {
      background-color: Orange;
    }
  </style>
</head>
<body>
  <h3>
    Hello World !</h3>
</body>
</html>
```

```
<!DOCTYPE html>
<html>
<head>
  <title>Welcome to HTML</title>
  <style type="text/css">
    body
    {
      background-color: Orange;
    }
  </style>
</head>
<body>
  <h3>
    Hello World !</h3>
</body>
</html>
```

- Headings and Paragraph
 - Implement structural hierarchy
 - Semantic
- List
 - Unordered
 - Ordered
- Emphasis and importance

Hyperlink

`<a href="https://www.mozilla.org/en-US/">the Mozilla homepage</a>`

A **URL**, or Uniform Resource Locator is a string of text that defines where something is located on the Web. For example, Mozilla's English homepage is located at <https://www.mozilla.org/en-US/>.

- Path
 - Same directory
 - Down into subdirectories
 - Back up into parent directories
- Document fragments
- Absolute versus relative URLs

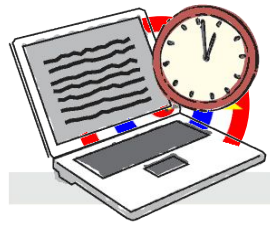

<Khoa hoc tu nhien>
 "Khoa hoc tu nhien"

- ☐ Tables
<https://developer.mozilla.org/en-US/docs/Learn/HTML/Tables>

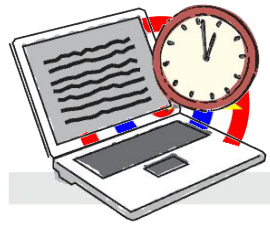

Group assignment

Use the knowledge you've learned to create a website that displays information about the group, including:

- ☐ A group photo of all members
- ☐ Detailed information about the group, including the group name, list of members, and student ID
- ☐ Use an image map so that clicking on a member's face will navigate to that member's information page.

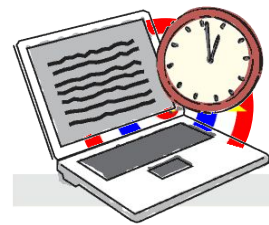

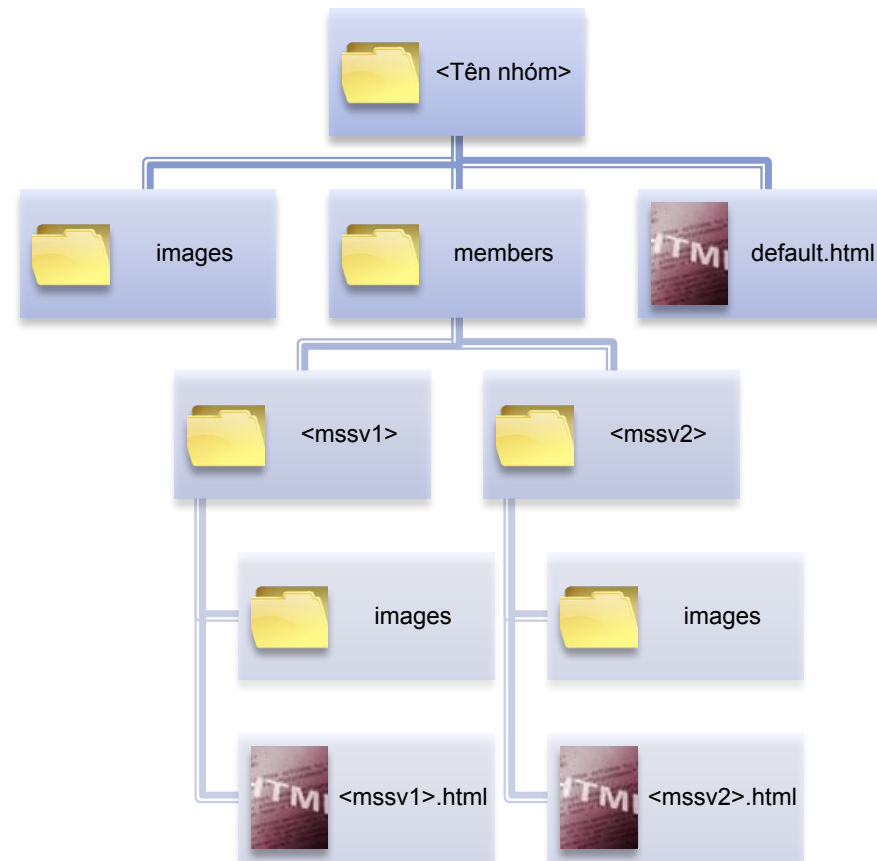

The member information page should include:

- ☐ Profile picture
- ☐ Full name
- ☐ Student ID
- ☐ Date of birth
- ☐ Email
- ☐ Phone number
- ☐ Link to return to the group information page.

- File and directory structure for the submission

Feature	Điểm
Correctly display the group website and member pages	3
Image map for the group website	3
Organize the directory structure properly	2
Upload the group website content to a host (specify the URL of the website on the host in the report)"	2
