```
<body style="background-color: Blue">  
  <div style="width: 50px; height: 50px; padding: 20px; border: 1px solid black;  
    margin: 30px; background-color: Red">  
    <div style="width: 100%; height: 100%; background-color: Green">  
    </div>  
  </div>  
</body>
```

position	Occupation	Flow
static	✓	static by default and not affected by the top, bottom, left, and right properties.
fixed	☐	positioned relative to the viewport, which means it always stays in the same place even if the page is scrolled
relative	✓	positioned relative to its normal position. Setting the top, right, bottom, and left properties of a relatively-positioned element will cause it to be adjusted away from its normal position
absolute	☐	positioned relative to the nearest positioned ancestor
sticky		positioned based on the user's scroll position. A sticky element toggles between relative and fixed, depending on the scroll position.

- The **float** property specifies whether an element will float to the left or right.
- The elements following the floated element will move up to fill the empty space left by that element.

```
<h1>Ví dụ về float: right</h1>

I have worked on a number of projects with LifeChurch.tv, one of the most innovative churches in the US.

I created and curate the 960 Grid System, used by thousands of web designers and developers in their everyday work.

I made Formalize, a CSS & JavaScript framework for displaying form elements consistently in multiple browsers.

I speak several times per year at various conferences and local meet-ups. I might be available to speak at yours.

VISION

SonSpring is a small, Christian web studio that specializes in creating sites for churches and ministries. My mission statement and fervent prayer is to do my utmost to glorify the Lord

FOCUS

To use an old cliché, I care about quality over quantity. More value is placed on a job well done with a smaller number of clients, rather than sacrificing attention to detail by accepting too

INFO

I hold an MDiv degree from Asbury Seminary. Formally trained in a theological capacity, I am primarily self-taught in web development. Working with ministries provides me an
