

Introduction to Figma

Nguyen Le Hoang Dung

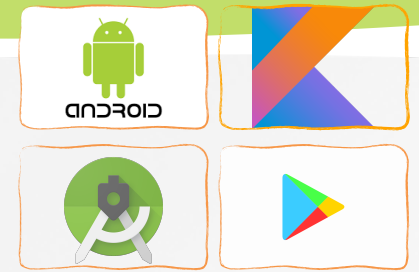

Content

- » This course aims to introduce all of the key functions in Figma.
- » We'll achieve that by building a set of app screens together.
- » We'll also use Figma's prototyping functionality to link the screens together, meaning you can experience how the screens will behave like they would if this were a functional app ready for people to download and use.
- » You'll be able to share your prototypes with friends, or develop your design further.

Welcome to Figma

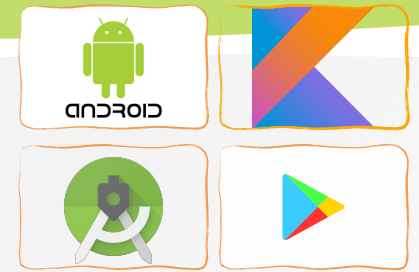

- » Figma is a collaborative interface design tool that's taken the design world by storm
- » It is a free, browser-based design tool.
- » Figma allows for real-time collaboration. We can simply share a link to the Figma file, which clients and colleagues can access and review in their browsers.

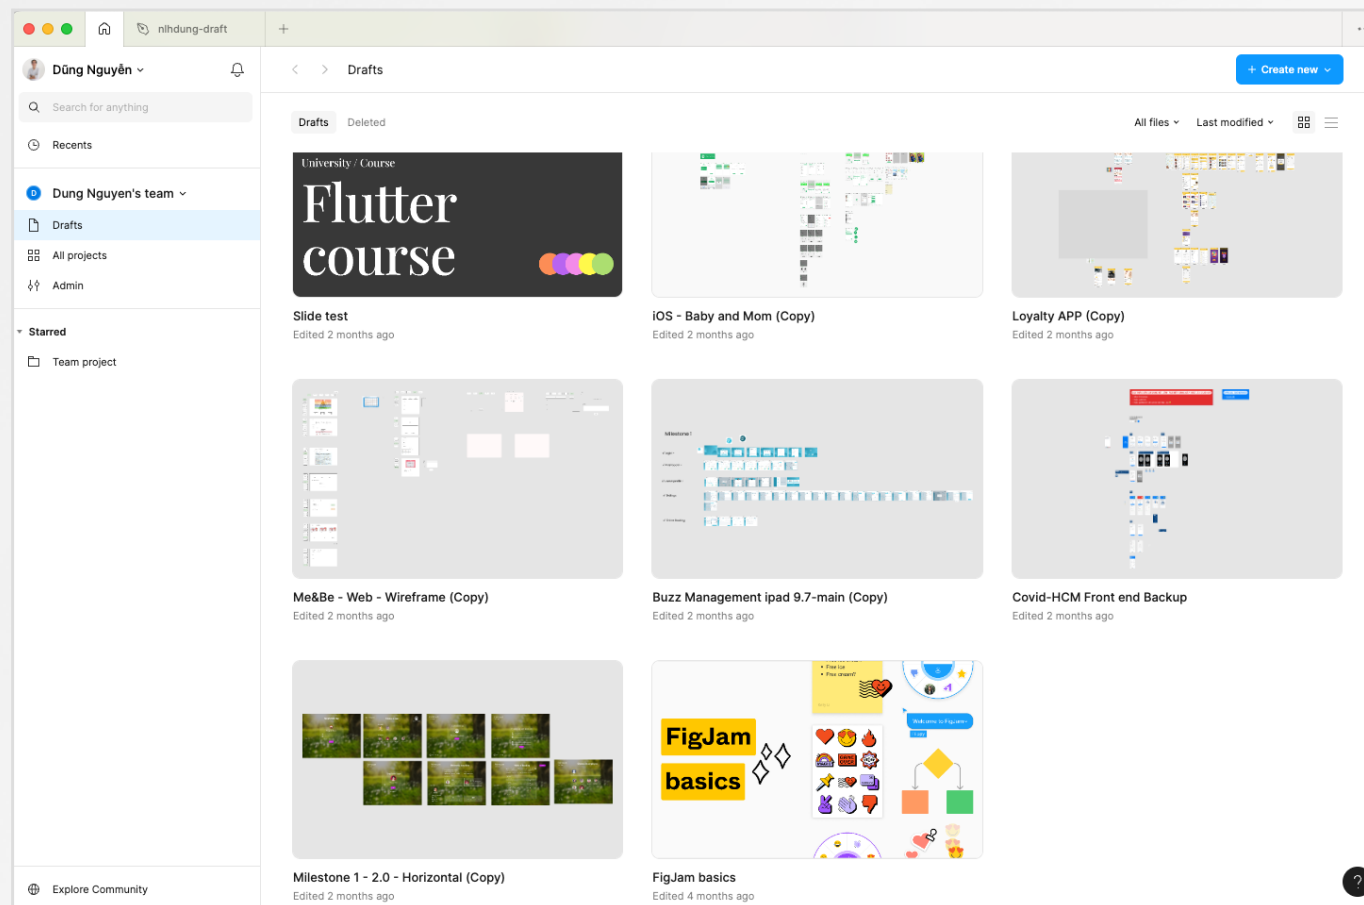

1st Section

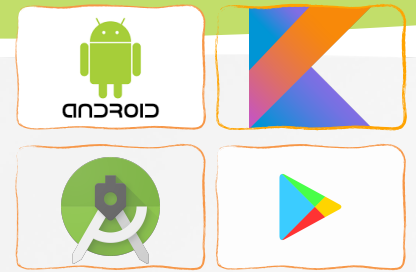

- » Find our way around Figma's interface
- » Experiment with some of the key functions
- » Learn important keyboard shortcuts
- » Figure out how to control the interface (zooming etc.)
- » Create Frames, Rectangles, and Text layers
- » Use Arrange and Align commands

Set up your Figma account

- » Let's create an account at Figma web www.figma.com
- » You can also download apps: <https://www.figma.com/downloads/>

Hola David,
¿Qué quieres hacer hoy?

Cambiar pesos a bolívars
Recibir bolívars en un banco en otro país en menos de 1 hora.

Usar mis dólares
Usar mi saldo para ahorrar o enviar dinero a otro país.
TIENES \$30,42 DÓLARES

Nuestra tasa 0,051
Tasa del mercado negro 0,082

¿A qué banco?
Mercantil

¿Cuánto quieres enviar?
500.000

Recibirán
9.863.000

New design file and New page

Create a Frame

- » A Frame is essentially a container for other elements.
- » Creating a Frame:
 - » Click the Frame tool icon in the toolbar (or Press F), then select a pre-set Frame size from the Properties panel on the right hand side of the window
 - » We can either click and drag in the canvas area.

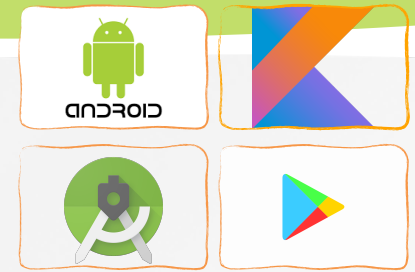

Create a Frame

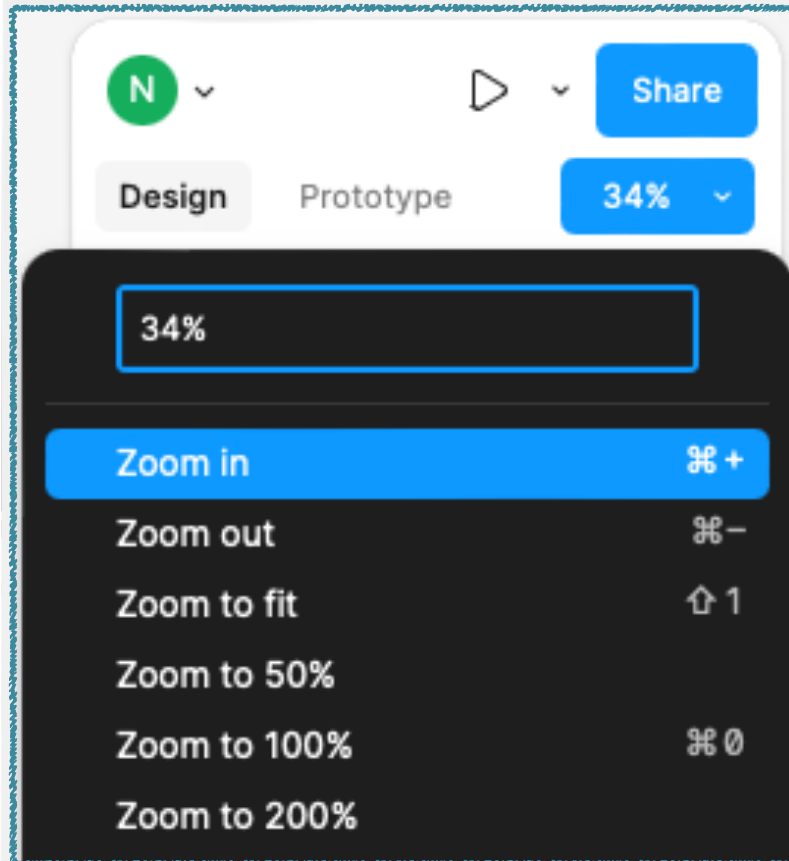

The screenshot shows the Axure RP software interface. On the left is a sidebar with project information (UMT_Demo), file/assets tabs, and a list of pages (Page 1, Page 2) and layers (Frame 1). The central canvas displays a blue square frame labeled 'Frame 1' with a dimension of 600 x 600. On the right, a red box highlights the right sidebar. Inside this box, a purple box labeled (1) highlights the 'Phone' category under the 'Frame' section. Below this is a list of device models and their dimensions. At the bottom, a red box highlights the 'Frame' icon in the toolbar.

Device	Dimensions
iPhone 14 & 15 Pro Max	430 x 932
iPhone 14 & 15 Pro	393 x 852
iPhone 13 & 14	390 x 844
iPhone 14 Plus	428 x 926
iPhone 13 mini	375 x 812
iPhone SE	320 x 568
iPhone 8 Plus	414 x 736
iPhone 8	375 x 667
Android Small	360 x 640
Android Large	360 x 640

FIGMA TIPS AND TRICKS

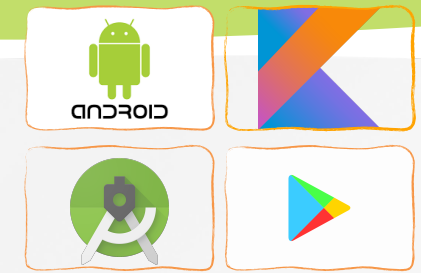

Tips and tricks

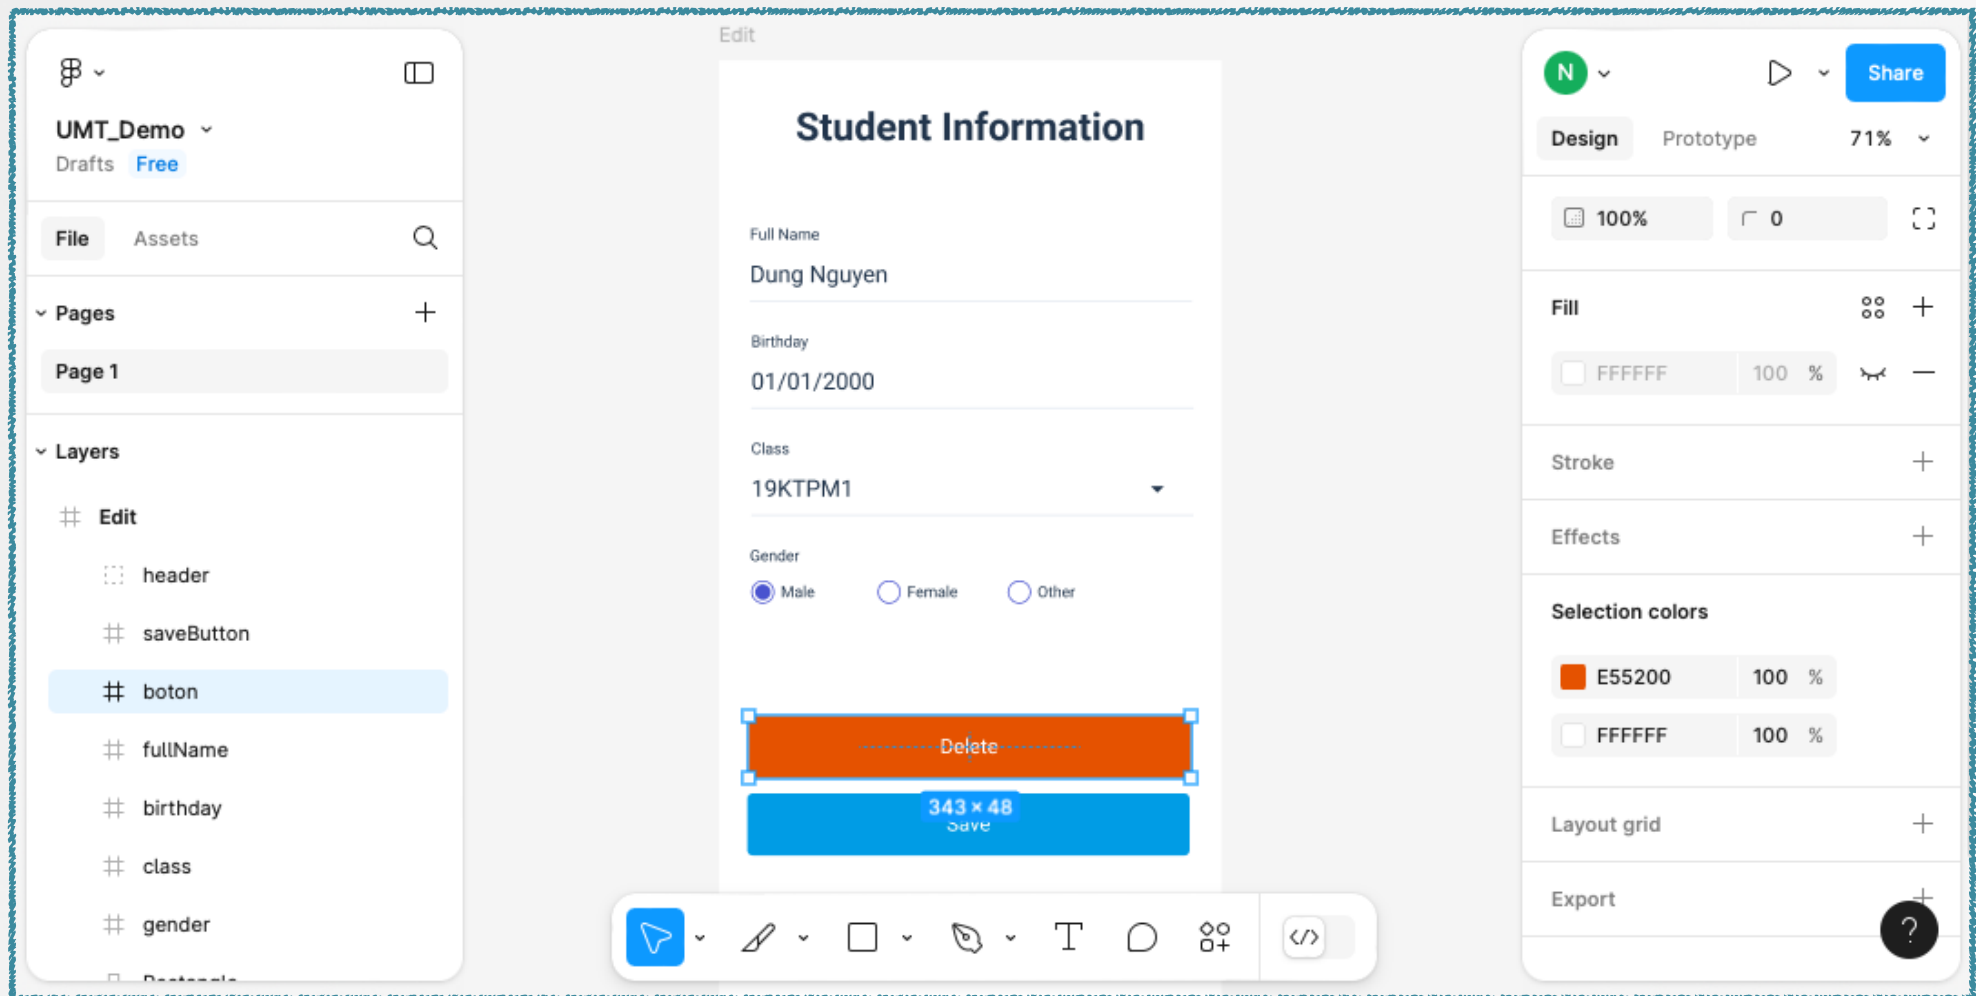

- » Export to image files
- » Paste vs Paste Over Selection
- » Lock & unlock
- » Show & hide
- » Pixel grid
 - Toggle the Pixel grid on and off: **⌘ + '** (Mac), or **Ctrl + '** (Win)
- » Show outlines: **⌘ + Y** (Mac), or **Ctrl+Shift+3** (Win)
- » Light & Dark modes: Figma menu (the top-left) > Preferences > Theme > {"System theme", "Light", "Dark"}

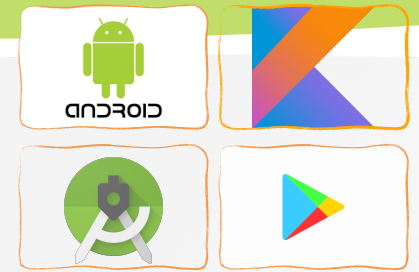

Q&A

Make your screen
